

SOCIAL NETWORKING

Sonya White

Utah Counties Insurance Pool

What is Social Networking?

It's the way the 21st century communicates. It's a grouping of individuals or organizations that share common interests or goals. Professional alliances and friendships are developed and first-hand information is gathered and shared.

Opportunities/Advantages of using Social Networking in Government:

In a study conducted in the summer of 2009, county/municipal government agencies lead the way in using Social Networking Tools. Existing services are enhanced and SN is a quick and easy way for the government to get the opinion of the public and to keep the public updated on their activities.
